

SMARiTT

(Stealth Monitoring And Recording inner Telecommunications Technology.)

(National Security Equipment ?)

By; Frederick (Charles Jenkins) Morton
223 Yesler Way, Apt. 1005 - Seattle, WA 98104

They really are watching you !!

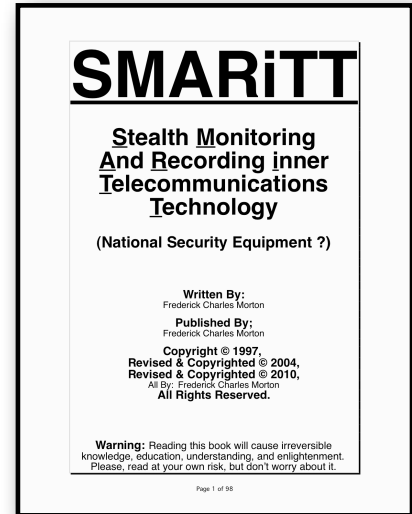

But you already knew that. It is a common, basic, natural instinct to be able to “feel” it when you are being watched.

However, when you are being watched, 24 hours a day, 7 days a week, 365 days a year, through millions or what could really be billions of microcameras, it can really throw your natural sensory perception for a loop. Plus, it is all recorded and stored in National Security Computers.

They really can listen to you think !!

But you already know that. You can hear them in your thoughts. This is done electronically with radio waves (radio eeewaves). Not only can they monitor and listen to your thoughts and everything you think, but they can also monitor your energy (feelings and emotions). It is all electromagnetic and it is all recorded and stored forever in taxpayers computers.

Read The Book !!

It's Free Online !!

? Are you one of the good people.

Do you do it right. Did you get good grades in school. Did you go to college. Do you have one of the good jobs. Then there is no reason why the SMARiTT people shouldn't let you in on SMARiTT. After all, we all just want the same things; To protect ourselves and our families from the bad people. You should go right down to your local police station and demand that they let you in on it, “the family way”. Also, people have the right to prove their innocents with SMARiTT. Putting innocent people in prison for crimes they didn't commit does several things. One, it destroys an innocent person's life; Two, it allows the person or people who committed the crime(s) to get away with it and helps them to become more confident and secure in their criminal activities; Three, it prevents the victim(s) from acquiring justice and balance; and More.
